

# Amazing occasions for children and their families

Family Events

## **Guide Dogs family events are a great day out where your family can relax and have fun together – and meet other families with similar stories.**

They allow children with a vision impairment to build confidence and make lifelong friends.

### **What's on?**

We host events around the year at a variety of exciting venues, from theatres to zoos, from theme parks to sensory playgrounds. New events are added all the time so visit our webpage to stay up to date.

### **Family weekends**

If your pre-school age child has recently been diagnosed with sight loss, we run an annual family weekend event especially for you and your family.

### **Guide Dogs experience days**

You can also come along to family Guide Dogs experience days at our regional centres and find out whether your child might benefit from a guide dog partnership in the future.

With Guide Dogs team members at every event, you'll be able to discover our range of other children and family services.

### **We're here for you whenever you need us.**

Guide Dogs has a range of services and resources, especially for children, young people and their families.
