

**The tools to help
your child live life
to the full**

Sensory grants

Sensory training can develop many different skills, and is one of the most effective ways to stimulate your child's senses, like hearing, touch, smell, and taste.

Why it matters

Sensory equipment is proven to support social, emotional and technology skills, and can have a positive effect on your child's social skills and school life.

What we offer

We are here to help you select the most appropriate sensory toys, apps and equipment, and because we don't sell this equipment our advice is always independent and unbiased.

We can also help fund sensory equipment for home use.

We're here for you whenever you need us.

For free advice, or to find out whether you or your child qualify for funding, please get in touch. We can help you fill in the application form and answer any questions you may have.
